

30th European Workshop on Computational Geometry (EuroCG 2014)

Dead Sea, Israel, March 3-5, 2014

EuroCG

The European Workshop on Computational Geometry (EuroCG) is an annual, informal workshop whose goal is to provide a forum for scientists to meet, present their work, interact, and establish collaborations, in order to promote research in the field of Computational Geometry, within Europe and beyond. The workshop aims at providing an informal atmosphere through which both established and young researchers will have a productive exchange of ideas and collaboration. EuroCG does not have formally reviewed proceedings. A book of abstracts is distributed at the conference site and does not have an ISBN number, and the pdf files of the abstracts available on the EuroCG websites should be regarded as preprints. Therefore, results presented at EuroCG are often also submitted to peer-reviewed conferences and/or journals.
