Google is coming to BGU!

We are happy to invite you to Google's special event at Ben-Gurion University.

On June 19<sup>th</sup> at 12:00 you are all invited to hear about one of Google's coolest projects – "Project Tango" that was presented in Google I/O 2016.

The talk will be led by Adva Glasner, a program manager in the Tango team.

Also in this event, you will learn which commonly-used products Google works on in Israel and about Google's hiring process for interns / full-time roles.

The event is expected to be 2.5-3 hours long, with a break for food and mingling.

As Google will be ordering food and handing out fun swag, they will need to know how many people will attend. Also we want to make sure that there will be room for everyone.

Please register in this form by Thursday, June 16<sup>th</sup>.

If you would like Google to contact you about student / full time positions, please also upload a link to your resume (on a Google doc).

The tech talk will take place in the Saal Auditorium (2nd floor) - Room 202, Building 37.
