Israel, the Jewish people, and all mankind.

nour in the University in its mission to serve the Negev, the land of God's promise.

A new center enables present and future generations of students, scholars,

and researchers to gain knowledge and may be found at the frontier of computer

science, information technology, and computer sciences.

The Frankel family, Philadelphia,

Concordantly endowed through the establishment of

CENTER FOR COMPUTER SCIENCES

L'ANNE AND WILLIAM FRANKEL

We hereby proclaim the establishment of the

Frankel Family, Presidents of the

University of the Negev, and the Negev,

and the presence of members of the academic staff, administration, and

funding partners.

In this Land of Abraham, the Tenth Commandment, and God.

BEN-GURION UNIVERSITY

OF THE NEGEV
The Lynne and William Franke Center for Computer Sciences

The development of high-technology and computer-based industry is vital for Israel's economy and a top national priority for the future.

The Lynn and William Franke Center for Computer Sciences was established in order to encourage the development of programs in computer science at Ben-Gurion University of the Negev and to bring together the researchers interested in computer science.

The new Center will support both applied and theoretical research in the field, from computer science to electrical engineering, from algorithms and data structures to formal and programming languages, from image processing and pattern recognition.

The academic committee of the Center consists of Prof. S. Even, Prof. P. A. Cheriton, and Dr. A. Keshavarz. Prof. Keshavarz will serve as Director of the new Center.

The development of high-technology industry in the State of Bnei Brit in the coming years.
